

DAY 1

Problem 7: [Valid Palindrome](#)

Code:

```
class Solution {
public:
    bool isPalindrome(string s){
        int l = 0;
        int e = s.size()-1;
        while(l<=e){
            if(!isalnum(s[l])){
                l++;
            }else if(!isalnum(s[e])){
                e--;
            }else{
                char t1=tolower(s[l]);
                char t2=tolower(s[e]);
                if(t1!=t2)
                    return false;
                l++;
                e--;
            }
        }
        return true;
    }
};
```

Output:
